

# Timber Decking SEALER

This superior no-fuss sealer is formulated to restore old weathered decks and provide long UV protection. Perfect for newly constructed decks and outdoor furniture too.

We also supply and deliver Australian and imported hardwoods.

## Getting the best Sealer results

For a top quality finish, apply to clean dry wood that has been sanded to remove mould and loose fibres if necessary. If mould is still present, treat affected area with a solution of 1 part bleach to 2 parts water. Wash away all traces of bleach and allow to dry before applying sealer.

Apply sealer with a short nap paint roller and brush. The first coat should be a light and even application. Apply the second coat within 30 minutes of the first coat. Do not apply in excessive heat or if rain is imminent. Brushes wash out in water.

# The Timber Decking Supply Shed is a one-stop-shop for people building decks, pergolas and outdoor living constructions.

Whether you are a professional home builder or renovator, or a DIY weekend warrior we have every thing you will need.

That includes professional advice and design ideas too!

Before sealing with our Sealer

After sealing - *sensational!*

## The Timber Decking Supply Shed makes it easy

We have been building timber decking and outdoor environments for years, so we know exactly what you are up against when you want to construct your own timber decking. If you are new to building decking or pergolas you'll no doubt have lots of questions that need answers before you start.

The good news is you don't have to be the expert – because we are – and we are here to make the job easy for you. If you are already in the building game and you are after expert advice and a reliable supply of timber building products then try us at The Timber Decking Supply Shed. We work regularly with builders and project managers and understand all your timber supply and hardware needs.

Opening hours vary so please contact
